

PREET KARWAL

Full-Stack & Agentic Software Engineer | MERN Stack | AI Automation | REST APIs | System Design

Sonipat, Haryana | +91-8572874207 | preetverma365@gmail.com | github.com/Mr-Elegant | linkedin.com/in/preetkarwal |

Portfolio - preetportfol.vercel.app

PROFESSIONAL SUMMARY

Full-Stack & Agentic Software Engineer with 3+ years of experience building scalable MERN stack and Next.js applications, enterprise-grade REST APIs, and AI-powered automation systems. Experienced in designing and deploying agentic workflows — integrating LLMs, function/tool calling, and multi-agent pipelines into production applications to automate complex business operations. Built and shipped a full-cycle Loan Origination & Management System (LOMS) for an NBFC, integrating Zoho CRM, Zoho Books, and WhatsApp Business API. Proficient in leveraging AI-assisted development (GitHub Copilot, Claude, Cursor IDE) to accelerate feature delivery by ~35%. Comfortable owning end-to-end delivery: system design, backend development, cloud deployment on AWS EC2, and cross-team leadership.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, React Router, TanStack Query, Vite, Tailwind CSS, shadcn/ui, Bootstrap, Chakra UI, Framer Motion, GSAP, react-tinder-card, tldraw

Backend: Node.js, Express.js, REST API Design, Socket.IO, JWT, OAuth 2.0, Better Auth, Passport.js, bcrypt, Mongoose ODM, Prisma ORM, Microservices Architecture, RBAC, Node-Cron

Databases: MongoDB, PostgreSQL, MySQL, Redis (Pub/Sub, Caching)

Cloud / DevOps: AWS EC2, AWS SES, Nginx (Reverse Proxy), PM2, Vercel, Cloudflare DNS/SSL, Linux Server Admin, Git, GitHub

AI & Agentic Dev: LLM Integration, AI SDK (Vercel), OpenRouter, Streaming AI Responses, Function/Tool Calling, Multi-Agent Systems, AI Workflow Automation, Prompt Engineering, Agentic Pipelines, GitHub Copilot, Claude (Anthropic), Cursor IDE, ChatGPT, Gemini

CRM / Integrations: Zoho CRM, Zoho Books, Zoho Forms, Zoho People, WhatsApp Business API, Razorpay, Cloudinary

Concepts: Agentic System Design, Microservices Architecture, RESTful API Design, System Design, Agile/Scrum, RBAC

PROFESSIONAL EXPERIENCE

Software Engineer | Shree Vishnupriya Finance and Leasing Limited — Dwarka-11, New Delhi **May 2025 – Apr 2026**

Fintech | NBFC — Full-time

- Architected and delivered a full-cycle Loan Origination & Management System (LOMS) — covering application intake, automated credit assessment workflows, loan sanction, disbursement management, and EMI repayment tracking, fully aligned with RBI-compliant NBFC operational standards.
- Designed and deployed an agentic automation layer using function/tool calling and workflow orchestration — enabling LOMS to autonomously trigger Zoho CRM updates, Zoho Books ledger entries, and WhatsApp borrower notifications based on loan lifecycle events, eliminating manual data entry across departments.
- Built a WhatsApp Business API automation pipeline integrated with Zoho CRM to trigger contextual borrower notifications, EMI payment reminders, and lead nurturing sequences — reducing operational overhead significantly.
- Deployed and configured production server infrastructure on Linux using Nginx (reverse proxy) and PM2 (process management); delivered three full-stack company platforms: shreevishnufinance.com, benissglobal.com, benissfoundation.org.
- Led the backend development team for the Beniss Global investment platform — overseeing code reviews, sprint planning, and deployment pipelines.
- Leveraged AI-assisted development (GitHub Copilot, Claude, Cursor IDE) to accelerate feature delivery by ~35%, improve code review cycles, and auto-generate boilerplate for LOMS modules.

Full-Stack Developer | MindGeeks Tech LLP — New Delhi

Mar 2022 – Aug 2024

Services — Full-time

- Developed and maintained 5+ scalable full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), serving production traffic with high availability.
- Designed and implemented secure RESTful APIs with JWT-based access/refresh token authentication, role-based access control (RBAC), and bcrypt password hashing.

- Improved API response times and MongoDB query performance through indexing strategies, aggregation pipeline optimization, and efficient Mongoose schema design.
- Collaborated in Agile/Scrum sprint cycles — contributing to system architecture decisions, technical documentation, and feature planning across cross-functional teams.

Software Developer Intern | AMS Web Solutions Pvt. Ltd. — Rohtak, Haryana

Jan 2021 – Jun 2021

Services — Full-time

- Built dynamic, data-driven web applications in PHP (OOP/MVC architecture) with input validation, SQL injection prevention, and session management best practices.
- Gained hands-on experience with database design, server-side rendering, and client-server communication in a professional environment.

KEY PROJECTS

DevNet — Developer Networking & Collaboration Platform | devnet.co.in

- **Real-time Chat & Presence:** Engineered 1-on-1 chat with Socket.IO featuring typing indicators, read receipts, and Cloudinary-based media uploads; scaled to multi-instance deployment using a Redis Pub/Sub adapter.
- **Collaborative Whiteboard:** Integrated tldraw for live collaborative drawing with single-click invite-from-chat, backed by Redis-scaled Socket.IO.
- **Developer Discovery:** Tinder-style swiping (react-tinder-card) with connection request management and auto-fetched GitHub repositories and contribution stats via OAuth 2.0 (Google & GitHub via Passport.js).
- **Monetisation:** Integrated Razorpay for tiered (Silver/Gold) premium subscriptions with HMAC-SHA256 webhook validation; community feed with Markdown, syntax-highlighted code posts, and nested Q&A.

Tech Stack: React.js, Vite, Redux Toolkit, Tailwind CSS, Framer Motion, tldraw | Node.js, Express.js, MongoDB, Socket.IO, Redis | AWS EC2, Nginx, PM2, Cloudinary, Razorpay, AWS SES, Passport.js, Node-Cron

DevNet Chat — AI Chat Workspace & Conversation Manager | dev-net-chat.vercel.app |

github.com/Mr-Elegant/DevNet-Chat

- **AI Chat Experience:** Built a full-stack chat application with streaming AI responses using the AI SDK and OpenRouter, including model selection, saved conversations, and polished message rendering.
- **Authentication & User Sessions:** Implemented secure social login with Better Auth, supporting both GitHub and Google sign-in, plus protected routes and session-based access control.
- **Chat Management:** Designed a sidebar-driven conversation system with search, grouped chat history, optimistic delete, and smooth animated transitions for a responsive user experience.
- **Responsive UI/UX:** Created a modern, mobile-friendly interface using shadcn/ui and Tailwind CSS, with a dedicated sign-in page, responsive drawer sidebar, and refined loading/empty states for desktop and mobile.
- **Data Persistence:** Stored users, chats, and messages in PostgreSQL using Prisma, with chat history loaded dynamically per thread and persisted across sessions.

Tech Stack: Next.js 16, React 19, TypeScript, Better Auth, Prisma, PostgreSQL, AI SDK, OpenRouter, TanStack Query, shadcn/ui, Motion, Tailwind CSS, Sonner

EDUCATION

Master of Computer Applications (MCA) — Maharshi Dayanand University (MDU), Rohtak 2019 – 2021

Bachelor of Computer Applications (BCA) — Maharshi Dayanand University (MDU), Rohtak 2017 – 2019

CERTIFICATION

Networking Fundamentals & Ethical Hacking — Hi-Tech Institute, Karol Bagh, New Delhi
